

Rational Business Partners

Education and Enablement

Rational. software

Course Abstract:

With HATS you can transform your green/terminal applications into rich interface swiftly and easily!

This course teaches concepts and usage of Rational® Host Access Transformation Services (HATS). HATS, quickly transform 3270 and 5250 green screen applications to intuitive Web, portlet, rich client or mobile device user interfaces, and as standard Web services. The beauty of HATS is, all this transformation can be done without touching and modifying the original source code.

Following the course, attendees will be given the opportunity to take the following test for professional certification:

IBM Certified Specialist -
