C/C++
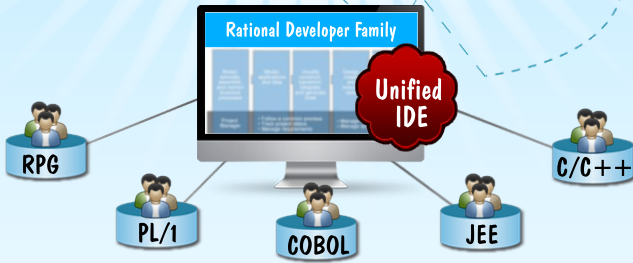

Rational Developer for Power Systems Software provides rich desktop Integrated Development, Porting, and Optimization Environment for multi-platform development.
Royal Cyber will ensure your success with RDp through four weeks of our services including set up, configuration, and mentoring.

Software: Rational Developer for Power Systems : RDp

Comprehensive application development, porting, optimization, and CALM solution: Simplify and accelerate code development and maintenance through a comprehensive application development, porting, optimization, and collaborative application lifecycle management, optimized for Power Systems and serving multi-platform development.

Improved team collaboration and productivity: Realize productivity gains of moving from older text-based, command-line development tools, to a rich integrated development, porting, optimization, and team collaboration environment.

Application portability: Reduces barriers and minimizes the risks of porting from other UNIX system implementations.

Lower training costs: Leverage a modern development environment to attract and retain new talent, many of whom are familiar with Eclipse tools, thereby helping to lower training costs.

Reuse and transfer skills: Make developers portable across projects using AIX, IBM i, and Linux and development tools for a wide range of programming languages, including Java, Java EE, C/C++, RPG, CL, DDS and COBOL..

Flexible packaging: Purchase only the components you need, individual development tools, studio bundles (tools and compilers), and Power tools bundles (Java development tools with native language tools).

Services:

Week 1
- ✔ Requirement gathering & Analysis
- ✔ Installation of RDp
- ✔ OOTB feature configuration
- ✔ Integration with basic necessary software

Week 2 & 3
- ✔ Customized Configuration as per Client Environment
- ✔ Complete Integration with existing Environment
- ✔ Automating Utilities, Mapping Business Process, Taxonomy
- ✔ Testing , Performance Tuning & Optimization

Week 4
- ✔ Training & Mentoring
- ✔ Documentation

- Remote Systems Explorer
- Integrated Search
- Smart Editors
- Integrated Builds
- Pan-language/platform debug
- Outline views, application diagrams

Package:

4 RDp License (IBM RATIONAL DEVELOPER FOR POWER TOOLS FOR I AUTHORIZED USER LICENSE) with 4 Weeks of Services.
